ICR: Fire & Rescue

Software to aid the Fire Service's Operations

ICR: Fire & Rescue is designed to aid Fire Services across the country in their operations. From Readiness, to Response and right through to Reporting, we have built smart simple and easy to use "apps" that provide incredible functionality in all areas of your team's operations. With our software applications we can deliver fast, focused & reliable information into the hands of your team as and when they need it. Record checklists, complete workflows, reference aid memoires all on one user friendly app and then seamlessly capture & record reports, before sending them to an online archive.

Utilise the capabilities of ICR's cloud & mobile software modules to provide your Fire Service with fast, reliable, focussed reliable real time information.

ICR™ Fire & Rescue Modules

Readiness Module

- ★ Paperless Information Management
- ★ Contact Directory Management
- ★ Paperless Checklists
- ★ Pre-Fire Planning Support

Response Module

- ★ Incident Command Board Application
- ★ Take Notes & Photographs at Scene
- ★ Reference Guidance Documents on the Go
- ★ Real Time Incident Log Visibility

Reporting Module

- ★ Auto-Generate Incident Reports
- ★ Auto-Generate Analysis Reports
- ★ Archive Paperless Reports
- ★ Archive Paperless Checklists

A photograph of firefighters in a station. In the foreground, a man in a yellow high-visibility vest and a firefighter in a helmet and glasses are looking at a tablet. Another firefighter is visible in the background, also in uniform. The scene is set in front of a red fire truck.

Fast, Focused,
Reliable
Information
in your crew's
hands

Readiness Module

Paperless Information Management

Centralised information management software aids your organisation in managing information. Easily store, version control & distribute documentation paperlessly to your crew on their mobile devices.

Contact Directory

Maintain reliable contact directory information and deploy 'touch-to-dial' numbers to all units across the county via 'apps' on their mobile device. No more searching for the correct numbers as we do it for you.

Paperless Checklists on a Tablet

Our 'One Touch Checklists' will save your unit's time when carrying out inspections or checklists. Take notes, add photographs of defects etc. and before you get back to your desk, your report has been filed online.

Pre Fire Planning Support

No more carrying around folders of information when attending sites. Pre-fire plans can be stored online and then deployed to your unit's phones or tablet. Version control, update & manage easily online too.

Benefits

- ★ Fast & Focused Distribution of Documents
- ★ Reliably Deploy Documents to all Units
- ★ Version Control Documents in Circulation
- ★ Information Stored Locally on Mobile Device
- ★ Information available when needed most
- ★ Reduce Administration Hours
- ★ Reduce Printing Costs
- ★ Increase Efficiencies of your Service

Application Screenshots

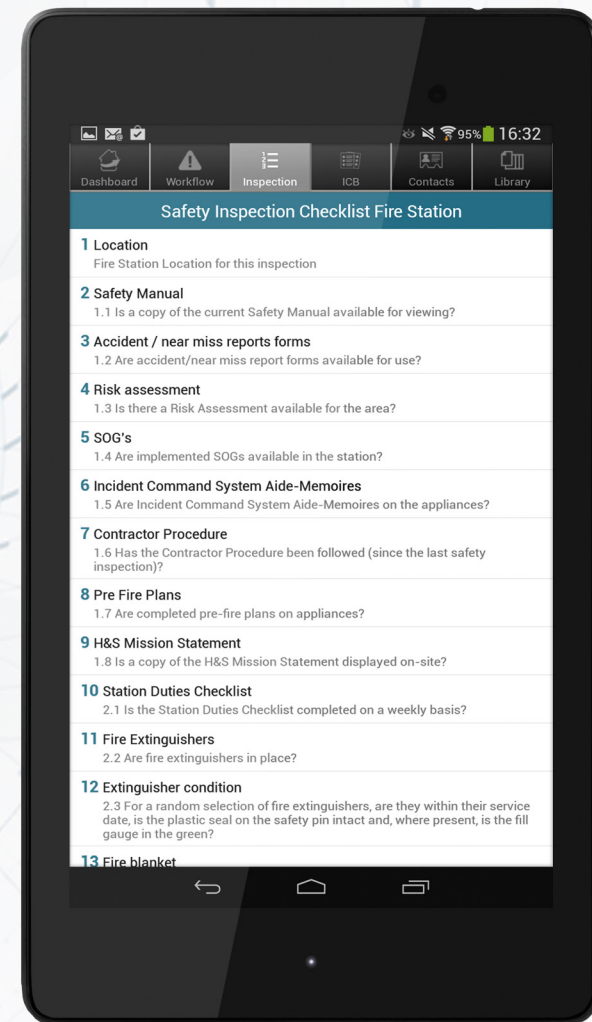

1. Pre Fire Plans & Layout Drawings available stored locally on devices, to assist pre fire planning or on scene incident

2. SOG's, Risk Assessments & Handbooks stored locally on the device for immedia reference in folders which aid ease of access.

3. Deploy updated documentation to all mobile devices across the county at the touch of a button.

4. Tap & Complete checklists can now be completed on the same application. By the time your team get back to their desk, the checklist report is filed online & waiting for them!

Response Module

Incident Command Board Application

User friendly 'apps' combines functionality of traditional Incident Command Board with the intuitiveness of an application. Attending units can easily record & capture vital Incident Command details ensuring compliance with procedures.

Reference Guidance Documents on the Go

Intuitively reference reliable & relevant information from within the 'Action Card' such as Standard Operating Guidance, Aid Memoires, Pre Fire Plans & Layout Drawings quickly and easily, on an app when & where you need it.

Take Notes & Photographs

The user friendly apps capture notes & photographs from the scene. Share with colleagues in real time or simply pin them to the incident log (see below) for follow up investigation.

Incident Log Recording

The user friendly apps date & time stamps an incident log which can be shared with colleagues in real time, either on line or through their mobile device. After an incident, these incident logs can be used to build an incident report.

Benefits

- ★ Aid Memoires & Checklists Ensure Compliance
- ★ Quick & Easily Deploy to County Wide Units
- ★ Version Control Each Action Card in Use
- ★ "App" doesn't require Internet Connection for use
- ★ Capture Invaluable Information at the Scene
- ★ Incident Logs Captured in Real Time
- ★ Share Incident Logs Quickly & Easily
- ★ Archive Incident Logs & Action Cards

Incident Command Board

1. Incident Command Board on an App
Mirrors the same input fields as Traditional
Incident Command Boards.

2. Quick Selection of Data is facilitated
through drop down menus & pre populated
information & checkboxes.

3. Once you have completed the relevant
section, press save and move on to the
next data entry field i.e. Appliance & Crew,
Section & Functional Officers, Tactical
Mode etc.

4. Pressing Save Date & Time Stamps the entry, and
saves it to the Incident Command Board Log. This log
is viewable online from anywhere in the world when
connected to an internet connection.

5. Drop down menus present the user with Station
biased information ready for quick selection. Duplica-
tion of entries is avoided through intuitive design and
planning.

6. Add Many Photographs & Notes quickly. Date & Time
Records for follow up reporting purposes.

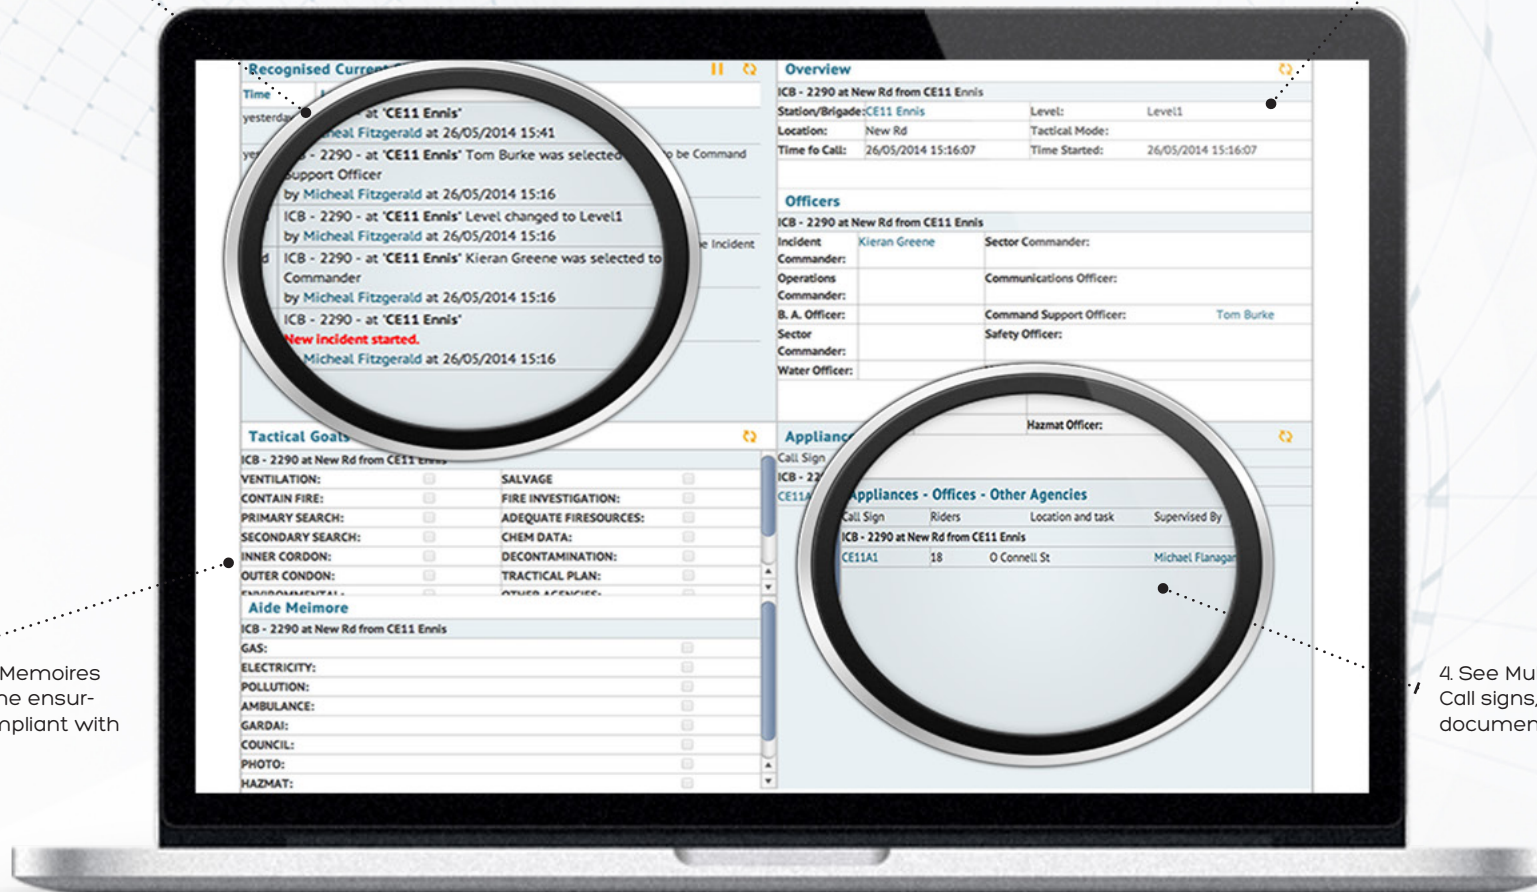

Real Time Visibility of Incidents

1. Real Time Incident Command Board Log Available on Laptops, PC's, & Internet Enabled Devices. Real Time Visibility of Populated Incident Command Boards.

3. See Incident Level, Time, Tactical Mode, & Location as you are on the go.

2. Tactical Goals & Aid Memoires are updated in real time ensuring your team are compliant with procedure.

4. See Multiple Incidents Running in Parallel. Call signs, Riders, Location & Tasks are documented as well as those supervising.

Mobile Solutions
When you need it,
Where you need it.

Report Module

Automatically Generate Reports

Checklists, Action Cards, & Incident Logs are automatically generate reports, which can easily be retrieved without having to spend hours typing, thus saving your unit both time & money.

Automatically Generate Analysis Reports

Incident Data is readily available in graph & pie chart form, providing your team with printable reports for use when reporting. Data is automatically captured and formatted so you don't have to!

Archive Paperless Reports

Because this solution sits on our secure data server, you can access reports, checklists & incident logs from any internet enabled device with a username & password. Filter & Search reports quickly & easily.

Archive Paperless Checklists

Conduct all your inspections and checklists as required, then retrieve completed checklists quickly & easily from the archive. Search & Filter Functionality also makes this process easy.

Benefits

- ★ Minimise Paperwork
- ★ Reliable Reports are date & time stamped
- ★ Easily Search & Retrieve Reports
- ★ Quickly Print Reports
- ★ Reduce Administration Costs
- ★ Spend more time on value add work
- ★ Access Insightful Analytics Instantly
- ★ Increase Efficiencies of your Service
